DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-37, 71-88, drawn to an activity center, classified in class 482, subclass 37.
- II. Claims 38-53 and 89-92, drawn to an activity center and riding element, classified in class 472, subclass 37.

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because group 1 does not require a riding element. The subcombination has separate utility such as a playground slide. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Figure 1
- II. Figure 2

- III. Figure 3
- IV. Figure 4
- V. Figure 5
- VI. Figure 9
- VII. Figure 10
- VIII. Figure 11
- XI. Figure 13
- X. Figure 15

Should the applicant choose group II in the restriction requirement as set forth in paragraph 1, a supplementary election is required based on the following distinct species.

- I. Figure 5
- II. Figure 6
- III. Figure 8
- IV. Figure 12A
- V. Figure 12B
- VI. Figure 12C
- VII. Figure 12D
- VIII. Figure 18A
- XI. Figure 19

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 93-101 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, **and a listing of all claims readable thereon**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
